Mariano César D'Angelo

Ushuaia, Argentina ・ marcesdev@gmail.com ・ +5492901606964 ・ LinkedIn ・ marces.dev

Senior Full Stack Developer with experience in fintech, e-commerce, marketing, citizen services, and other business applications. I combine Software Engineering principles with a practical approach to solve problems efficiently, balancing trade-offs between delivery speed, scalability, and maintainability. I value clear and collaborative communication, trust, and empathy, creating an environment where teams share knowledge and grow together.

Skills

Programming languages: JavaScript, **TypeScript**, PHP, Java, SQL, Bash

Frameworks & libraries: **React**, React Native, **Node**, **Next**, NestJs, Redux, Jest, Cypress, Laravel, Symfony

Cloud & DevOps**:** AWS, Docker, Linux, CI/CD

Software Architecture & Development Practices: Microservices, API Design, Mobile, TDD, Agile (Scrum/Kanban)

Languages: English (Intermediate - B1/B2)

Professional Experience

Accenture – Remote – Full-Time   Feb 2025 - Present
Front End Developer
Keywords: JavaScript, Typescript, React, GitHub

Working as an external consultant for MercadoLibre on a user analytics project. Focused on analyzing user segments to better understand their needs based on demographic and behavioral data.

Zennovia – Remote – Contract   Nov 2024 - Feb 2025
Full Stack Developer
Keywords: JavaScript, Typescript, PHP, Symfony, Vue, SQL, Docker, GitLab CI/CD

- Contributed to the maintenance and improvement of the VALT-IVS software solution. Worked on bug fixes and feature enhancements in both frontend and backend. Collaborated with an international team, submitting merge requests for code review and following strict quality standards enforced through automated pipelines.

- Improved Cofaloza's management system (Pharmacy Cooperative) by extending CRUD forms, implementing image processing, and adding advanced search and filtering functionality. Developed features for document processing, including PDF payment receipt generation with QR code and barcode integration.

Allie Systems – Remote – Contract   Jun 2024 - Nov 2024
Front End Developer
Keywords: JavaScript, TypeScript, React, GraphQL, Node, AWS, Docker, Microservices, AI, Agile, Manufacturing

I contributed to projects driving industrial automation and AI innovation:

- Collaborated on a back-office configuration management system using React, GraphQL, and NestJS, enabling clients to automate product parameter settings including process, efficiency, and plant health variables with advanced filtering and deep-link capabilities.

- Collaborated on the company's first AI-driven prediction feature for industrial line performance, Using machine learning to analyze continuous camera monitoring and predict unplanned production stops. This innovative technology attracted investors by demonstrating a practical AI application in industrial predictive maintenance.

Telecom – Remote – Full-time   Jul 2022 - Jun 2024
Full Stack Developer
Keywords: JavaScript, TypeScript, React, Next, Node, Redis, AWS, Docker, Microservices, CMS, Agile, Marketing

- Worked on business initiatives focused on customer acquisition and product promotion, developing and migrating landing pages integrated with a CMS to allow content teams to customize components without requiring deployments.

- Contributed to major campaigns like Hot Sale and Cyber Monday, ensuring smooth deployments and optimal performance. Converted design specifications into reusable components and supported the team with technical guidance.

- Built and optimized solutions on AWS infrastructure, integrating cloud services into CI/CD pipelines. Ensured code quality and security through testing, static analysis, and observability best practices.

Technisys – Remote – Full-time   Mar 2021 - Jul 2022
Front End Developer
Keywords: React, JavaScript, Redux, Redux Saga, Storybook, Node, Agile, Fintech

Developed the new home banking platform for Banco Provincia, unifying web and mobile experiences for over 9.8 million clients and 1.5 million businesses. Contributed to key features such as login flow, payment scheduling, and mobile recharges, while improving UX and system scalability. Participated in stress testing and backend optimizations to prevent service overloads. Worked closely with Technisys and Banco Provincia teams, ensuring alignment with business logic and best practices.

Poder Judicial de la Provincia de Tierra del Fuego – Ushuaia, Argentina – Full-time   Jul 2020 - Mar 2021
Full Stack Developer
Keywords: PHP, Laravel, SQL, Node, JavaScript, Vue

- Worked with the IT department of the Judiciary during its rapid digital expansion due to the pandemic, as in-person processes moved to fully digital workflows. Helped implement new features to streamline judicial interactions and contributed to scaling the system through document digitization.

- Designed and developed an internal reporting system, enabling judges to access historical case data with interactive visualizations for better decision-making and workload management.

Crosschq – Remote – Contract   Apr 2020 - Jul 2020
Front End Developer
Keywords: React, JavaScript, MobX, SaaS

Developed and maintained Crosschq's platform, focusing on bug fixes and feature improvements. Contributed to a PDF reporting system that helped hiring teams make data-driven decisions. Collaborated with the team in California, gaining insight into the growth and culture of an early-stage startup.

PanalSoft – Ushuaia, Argentina – Full-time   Feb 2019 - Apr 2020
Full Stack Web & Mobile Developer
Keywords: React, React Native, JavaScript, Redux, Redux Saga, PHP, Laravel, SQL, CMS

At PanalSoft, a consulting startup founded by my college professors, I developed web and mobile solutions for government entities and citizen services. Built platforms with features like geolocation, geocoding, CRUD back offices, content management systems, and offline functionality. Maintained direct communication with clients, adapting to different roles to ensure the successful delivery of tailored solutions.

Newsan – Ushuaia, Argentina – Intern   Aug 2018 - Feb 2019
Full Stack Developer
Keywords: PHP, Laravel, SQL, Redis, WebSockets, Node, JavaScript, Manufacturing

Developed and maintained an industrial traceability system at Newsan's Automatic Insertion Plant to monitor production and defect history of motherboard components used in home appliances. Implemented real-time tracking, defect analysis, and live dashboards, allowing operators and supervisors to improve quality control, optimize processes, and reduce errors through data-driven decision-making.

Universidad Nacional de Tierra del Fuego – Ushuaia, Argentina – Intern   Aug 2017 - Dec 2017
Full Stack Developer
Keywords: PHP, Laravel, SQL, CMS, jQuery

Developed landing pages for university initiatives, improving access to academic and cultural information. Created a Research Projects Portal for showcasing scientific work and a Cultural Agenda Platform for promoting theater, concerts, and workshops in Ushuaia. These solutions increased visibility and engagement within the university community.

Education

Systems Analyst, Universidad Nacional de Tierra del Fuego.
Web Development School, Platzi.
